

Marine Clamps

The E-Z-TY™ Rope Clamp handsomely fastens any rope loop while eliminating the tedious task of splicing. Made in the USA from space age, high impact, UV protected composite material. Its strength far exceeds rope manufacturers recommendations.

It's simple. Separate two halves of Rope Clamp. Lay rope in clamp with brass threads. Adjust rope to desired loop length. Fit main clamp half over existing rope and clamp. Screw down carefully and evenly until clamp is closed and rope is secure.

Rope Clamps in five different colors.

Designed and recommended for use with solid braided nylon rope, but also works great with other compositions of rope.

Be sure to ask about our matching rope ends too!
